

ACCESS SOLUTIONS FOR CONVERGED NETWORK MONITORING MADE SIMPLE

NetQuest has been providing innovative access solutions for network monitoring for more than 20 years. That's why some of the most respected network operators, government agencies, corporations, and solution developers in the world have made NetQuest the access partner they trust.

KEY FACTS

FOUNDED

1987

OWNERSHIP

Private

MISSION

To empower our customers with the ability to correlate converged core network traffic into service oriented flows without distortion.

TARGET MARKETS

- Telecommunications Service Providers
- Enterprises
- Government Agencies
- System Developers of Monitoring Equipment

SOLUTIONS

Network monitoring access and optimization for legacy and converged network technologies including POS, ATM, TDM, and Ethernet.

PRODUCTS

- Monitoring Access Optimizers
- cPCI and PCI Blades that integrate into network monitoring appliances

BENEFITS

- Reduce CAPEX
- Overcome tool limitations
- Leverage existing tools
- Access only data of interest

SERVICE AND SUPPORT

All products are developed at NetQuest and come with our 1 year warranty and exceptional support.

QUALITY

The NetQuest Quality Management System utilizes a network of ISO 9000 partners to deliver a world class product on a global basis.

MONITORING ACCESS OPTIMIZERS

The increased demand for network monitoring, combined with network convergence and blazing optical speeds has created a dynamic that demands separating network access from the monitoring platform or probe. NetQuest OptiCop Convergers enable network monitoring from T1/E1 to 10Gig Ethernet and/or SONET/SDH rates and are compatible with current and legacy network technologies.

BLADES

For network monitoring solution developers, NetQuest offers a family of cPCI and PCI blades designed for real-time network access, monitoring, inspection, and surveillance applications in WAN and/or LAN networks. The extensive use of programmable logic allows for unprecedented port density combined with the flexibility to rapidly customize the design to meet your exact requirements. The portfolio of blade technology makes extensive use of major building blocks that enable rapid integration into existing monitoring appliances, reducing time to market and increasing the solution's addressable market.

SERVICE AND SUPPORT

NetQuest offers a comprehensive portfolio of services that complement the product lines and ensure long term owner satisfaction long after purchasing. Through our extensive network of partners and internal subject matter experts, NetQuest's customers realize that they have a partner throughout every phase of the network operations lifecycle, from conceptual design and planning to configuration and ongoing maintenance. NetQuest service professionals have earned a reputation for excellence, demonstrated by the fact that many of our customers have been with us for over 10 years.
